

One of my close friend recently got selected for the Infosys Specialist Programmer role (9 LPA) through off-campus hiring. I'm sharing this interview experience so that it can help students who are preparing for this role.

Application Mode

Off-campus application

Shortlisting was based on the online coding test

Round 1: Online Coding Test

A total of 3 coding questions

Each question carried 100 marks

Difficulty level: Medium to Hard

Focus areas:

Problem-solving skills

Logic building

Time and space complexity

After clearing this round, the candidate was shortlisted for the technical + HR interview.

Round 2: Technical + HR Interview

Technical Questions Asked

The interviewer focused mainly on Python fundamentals, Data Structures, and Algorithms.

Python Concepts

Sets (properties, use cases)

Dictionaries (key-value operations, real-time examples)

Data Structures

Stack (operations, applications)

Queue (types, real-time examples)

Algorithms

Linear Search

Binary Search

Merge Sort (working and time complexity)

Questions were mostly concept-based, with emphasis on clarity and understanding rather than just definitions.

HR Questions Asked

Where do you see yourself in the next 5 years?

Are you willing to relocate anywhere in India (Pan India)?

Why do you want to join Infosys as a Specialist Programmer?

How do you handle challenges or pressure?

The HR round was simple and focused on attitude, flexibility, and career goals.

Final Result

After successfully clearing both rounds, my friend received the offer for Infosys Specialist Programmer with a 9 LPA package

Final Words

With proper preparation, consistency, and confidence, cracking the Infosys Specialist Programmer role is definitely achievable. I hope this experience helps students who are preparing for off-campus opportunities.

Candidate Information:

- Status: Fresher, actively seeking job opportunities
- Total Years of Relevant Experience: 0 years
- Target Position for This Interview: System Engineer
- Location: India
- Interview Date: October 4th, 2025 (Off-Campus)

Overview of Interview Process:

Initial Screening

- Duration: Approximately 2 hours
- Method: Online (Remote Assessment)
- Focus: Aptitude, logical reasoning, programming logic, and English proficiency
- **Key Questions:**
 - Quantitative aptitude problems
 - Logical reasoning questions
 - Pseudo-code and output-based programming questions
 - Verbal ability and English grammar
 - Essay writing to test communication and writing skills
- **Obstacles:**
 - Managing time across multiple sections.
 - Clearing the minimum cutoff for each individual section
- **Result:**

I cleared all the section-wise cutoffs, and the results were announced by the end of the same day. I was shortlisted for the next round.

Technical Round

- Duration: Approximately 15-20 minutes
- Method: In-Person
- **Focus:** Basic technical knowledge, project understanding, and HR-based questions
 - Introduce yourself
 - Explain your academic project(final semester) and why did you choose?
 - What are your strengths and weaknesses?
 - Tell me about your family
 - Describe a situation where you managed your time effectively
 - And also asked some of the questions from the resume.
 - Basic HR Questions were asked.
- **Obstacles:**
 - Explaining technical concepts clearly by communicating properly
 - Structuring answers confidently for HR-based questions

- **Result:**
I was not selected in Round 2.

Post-Interview Reflections:

- **Company Culture Insights:** The interviewers were professional and supportive. Infosys appears to value discipline, communication skills, and a willingness to learn.
- **Benefits Highlight:** The company highlighted learning opportunities, structured training programs, and career growth for freshers.

Additional Information:

- The interview process was completed within a short timeline, with quick communication of results.

Closing Note:

- Although I did not qualify for the final round, the Infosys interview experience was a valuable learning opportunity. It helped me identify areas where I need to improve, especially in technical explanations and communication. This experience has motivated me to prepare better for future interviews.

Candidate Information:

Status: Final year engineering student (Mechanical)

Target Position: Systems Engineer Trainee (For Freshers)

Year: 2018

Overview of Interview Process:

2 Rounds

Round 1: Initial Screening

Duration: 1 hour

Method: in-person

Focus: Quantitative aptitude test

Key questions: Common math problems like time speed distance, time and work, arithmetics, logical puzzles like patterns, verbal like grammar and comprehension

Obstacles: moderate difficulty questions

Result: approx 200/1000 candidates selected for next round

Round 2: HR Round

Duration: 20 odd minutes

Method: in-person

Focus: One on One technical and HR screening

Key questions: Once introduction was done, asked about my work in the projects that I had done. The I was asked to write a common algorithm like Fibonacci

Obstacles: nothing much, the interviewer was friendly

Result: 90% of candidates got through

Post-Selection:

- Onboarding in Mysore with batch-wise training
- 3-day induction covering policies, security, and campus orientation
- Rigorous foundational and domain-specific training (75% pass requirement for theory and practical)
- Posted to project location; top scorers got preferred locations
- Gradual responsibility increase through KT sessions and assigned tasks

Additional Information:

There might be a self paced learning module which might be assigned before joining the company.

There will be policy, compliance and technical courses that may be mandatory to complete within a few days after joining or allocation to a project.
