

Hello everyone,

I recently participated in the *TCS Ignite 2025* hiring process and wanted to share my experience. Hopefully, this helps aspirants who are preparing!

Note: As per my knowledge, the TCS Ignite exam is conducted twice a year — first in **February** and again in **June**. So, if you miss the first chance, do keep an eye out for the second.

I appeared in the June 2025 round, and here's my timeline:

Round 1: Online Test

Date: 14th June 2025

Mode: In-center, via TCS iON platform

Sections:

- Numerical Ability
- Verbal Ability
- Reasoning Ability
- (Optional) Coding section – languages included C, C++, Java, Python

Round 2: Documentation Check

Date: 7th July 2025

Process: Required to visit a TCS Center and verify academic records (10th, 12th, graduation mark sheets), government ID proof, and application form.

Round 3: Interview

Date: 8th July 2025

Duration: I was in the 1 PM batch, but my interview started around 5 PM — so be prepared for delays.

Panel: HR, MR, and TR.

Some questions asked:

- Tell me about yourself.
- Which technical language do you prefer? (I said Python – they asked about the latest Python version).
- Write a simple program on paper (e.g., swapping numbers without using a temporary variable).
- Are you comfortable relocating? Are your parents comfortable with it?
- Are you comfortable working night shifts?

Offer Letter

Date: August 2025

- I first received an email to submit a list of documents. After successful verification, I got my offer letter.
- In my case, I received it within 3 days, but this timeline may vary depending on the HR assigned to you.

Background Verification (BGV)

- After the offer letter, the next step was BGV through the TCS NextStep portal.
- This involves uploading documents for verification such as academic records, government IDs, and other required proofs.
- Once BGV is cleared, the joining letter will be issued (timeline not fixed).

Overview of Interview Process:

Initial Screening:

The selection process began with an aptitude round that consisted of three sections: Logical Reasoning, Quantitative Aptitude, and English. After clearing this round, I moved on to the Advanced Round, which included only Quantitative and Logical Reasoning sections, along with two coding questions. The first coding question in my case was an easy-level problem based on finding prime numbers. Only after successfully submitting the first question, the second coding question appeared, which was of medium to hard difficulty.

Technical Round:

After about a month of taking the TCS Prime test, I was offered the Prime role. Approximately ten days later, I was called for an in-person interview at the TCS office in Varanasi. It was a panel interview, with the technical, managerial, and HR interviewers all present together. The technical interviewer began by asking me to introduce myself. Based on my project explanation, he asked questions about the difference between XML and JSON. He then moved on to data structures and asked me to draw a circular queue, place some elements, and determine the positions of the front and rear after performing deletion and insertion operations. I was also asked questions about AVL trees, including their balancing logic and the different tree traversal methods such as inorder, preorder, and postorder. Additionally, I was asked to write a SQL query to create a view from an existing table containing the same records.

Following the technical round, the managerial interviewer asked how I would handle a conflict within a team, and whether I could build a website using only HTML and JavaScript. Lastly, the HR interviewer asked about my willingness to relocate and questioned how I believed I was a better candidate compared to others who had appeared for the interview. Overall, the interview was a mix of technical depth, real-world thinking, and situational judgment.

Candidate Information:

- Status: Selected for a digital role at TCS; Fresher
- Location: Kolkata, West Bengal, India
- Interview Date: Approximately 1–2 months after NQT result
- Target Position: TCS Digital Role

Overview of Interview Process:

Initial Screening

- Duration: Document verification took substantial time before the interview.
- Method: In-person at TCS Kolkata Office.
- Focus: Verification of eligibility and supporting documents.
- Key Details: Awaited patiently after document submission, called in for interview once the verification was complete.

Main Interview (Technical, Managerial, and HR in one panel)

Panel Composition: Three interviewers (Technical, Managerial, HR) present together.

Technical Round

- Duration: Approximately 30–45 minutes
- Method: In-person
- Focus: Assess skills and projects relevant to CV.
- Key Questions:
 - Medium-level pattern printing question requiring pseudocode.
 - In-depth questions about technologies and projects listed on the CV.
 - Explanation of technology choices.
 - DBMS fundamentals and SQL: Writing and follow up on SQL queries.
 - Backend technologies used in projects.
 - Data structures, including HashMap and HashSet implementations.
- Emphasis was on Java, SQL, and technologies mentioned in the skills section of the CV.

Managerial Round

- **Duration:** Integrated into the main panel interview
- **Method:** In-person
- **Focus:** Work attitude and behavioral assessment.
- **Key Questions:**
 - Alternate plans if not selected for the digital role.
 - Commitment to stay beyond initial years considering fresher attrition.
 - Aptitude questions (typical tricky interview puzzles).
 - Questions based on Google Cloud badge and hackathon experiences, discussed casually

HR Round

- Duration: Integrated within the panel interview
- Focus: Confirmation of interest and administrative details.
- Questions about ILP (Initial Learning Program) status and readiness.

Post-Interview Reflections:

The panel was supportive; their approach felt structured yet friendly, emphasizing practical know-how and clear communication. Questions reflected a balance of technical competency and attitude, giving a positive impression regarding team dynamics.

Additional Information:

- Received a Ninja offer from CodeVita 2025 on March 13, 2025 (Thursday).
- Gave the NQT exam on March 15, 2025 (Saturday).
- Later, received an upgraded digital offer from TCS on August 5, 2025.

Closing Note:

Overall, the interview required strong familiarity with the CV, careful explanation of project technologies, and readiness for typical backend, SQL, and data structure questions. The combined panel setting created a cohesive interview environment.

Candidate Information:

- Status: Fresher, seeking full-time opportunities | Final year Integrated M.Tech (IT) | Target: TCS Digital Trainee
- Location: Indore, Madhya Pradesh, India
- Interview Date: March 30, 2025

Overview of Interview Process:

- Initial Screening (NQT — March 20)
- Duration: 2 hours
- Method: In-person (CBT)
- Focus: Aptitude, Verbal, Reasoning, Coding
- Key Questions: Two coding problems — Fibonacci-based and one other
- Obstacles: Quantitative section was tougher than expected. Solved 7/7 on coding Q1, 4/7 on Q2

Technical Round (TR)

- Duration: ~20-25 minutes
- Method: In-person
- Focus: Core Java, Spring Boot, Projects, Internship

Key Questions:

- Code Fibonacci sequence in a range
- Explain your internship — role and day to day responsibilities
- What was your role in your Spring Boot Billing Software project?
- Spring lifecycle

- What is Dependency Injection?
- Object vs Reference
- Abstract class vs Interface
- Real life example of Abstract class usage
- What are REST APIs?
- PUT vs POST
- Obstacles: Forgot to print the result in the Fibonacci code. Recovered by explaining the logic clearly when asked.

Managerial Round (MR)

- Duration: ~15-20 minutes
- Method: In-person
- Focus: Soft skills, career intent, internship learnings

Key Questions:

- Tell me about yourself
- What did you learn at your internship beyond technical skills?
- Any chance of PPO at current internship?
- If you get a PPO which would you choose — current company or TCS?
- TCS is strictly on-site, are you okay with that?
- Any questions from your side?
- Obstacles: PPO question had a follow-up trap — they pushed even after I said no PPO possibility. Stayed composed and answered honestly.

Post-Interview Reflections:

- Company Culture Insights: Both panelists were calm and approachable. The atmosphere felt more like a conversation than a formal interrogation. Supportive energy throughout.
- Work Environment: TCS Indore campus. Well organized. Clear process for attendance, doc verification, and panel assignment.
- Benefits Highlight: On-site work culture discussed. Location preferences considered but not guaranteed.
- Evaluator Feedback: TR seemed satisfied with technical answers. MR was probing but fair — tested composure more than knowledge.
- Suggestions for Improvement: The wait time before panel assignment was around an hour. Better time slot management could help reduce candidate anxiety.

Additional Information:

- Shortlisting mail received on 27th March, interview confirmed on 28th, held on 30th — very tight turnaround
- Result received on 3rd April
- Selected as Ninja Trainee (had applied and interviewed for Digital profile)

Closing Note:

Overall a really positive experience for a fresher. The panel was genuine and made me feel comfortable. Got Ninja instead of Digital which was unexpected, but it's still a foot in the door. Not giving up on the Digital goal yet.
